

MICROELEMENTS

ERGOMIX FLOW

CE FERTILIZER - FLUID MIXTURE OF MICROELEMENTS
Boron (B), Manganese (Mn), Molybdenum (Mo), Zinc (Zn)

COMPOSITION

BORON (B) water soluble: 1%
MANGANESE (Mn) water soluble: 1 %
MOLYBDENUM (Mo) water soluble: 1 %
ZINC (Zn) water soluble: 2 %

AUTHORIZED IN ORGANIC FARMING

FEATURES

This product is a mixture of microelements studied to bring nutrients that work as catalysts during the absorption of the other nutrients and the growth of the plant.
It is particularly suitable in case of unfavorable conditions as parasite attacks or physiopathologies. We recommend to use ERGOMIX FLOW in spring, at the vegetative growth or immediately after the fruit-setting, in full summer to reduce the fall of leaves or to stabilize the excessive vigor to the detriment of productivity.

DOSES UND USE PATTERNS

FOLIAR TREATMENTS:

Fruit picking and viticulture: 1,5-2 kg per hectare, treat 4-5 during the production cycle.

Horticulture: 1 kg per hectare

FERTIGATION:

Horticulture: 0,5 kg per 1000 m²

Fruit picking: 10 kg per hectare

Floriculture: 0,3-0,5 kg per 1000 m²

PACKING: KG 6 DRUMS - BOXES OF 4 PIECES.
