

LIQUID FERTILIZERS

SOLFAMMONIO

LIQUID NITROGENOUS FERTILIZER AMMONIUM SULPHATE SUSPENSION

COMPOSITION

TOTAL AVAILABLE AMMONIACAL NITROGEN (N): 8%
SULFUR TRIOXIDE (SO₃) water soluble: 24%

FEATURES

SOLFAMMONIO is a specific compound to be applied mixed with post-emergence systemic herbicides. Particularly active with herbicides based on glufosinate ammonium, it has the following properties:

- it improves the active ingredients penetrations through the leaf cuticle and the other parts of the canopy reducing the absorption time;
- it enables faster absorption of the active ingredients through the linfatic system up through the roots;
- it gives a stimulating action thanks to its fertilizing properties with the following advantages:
 1. it is possible 30% herbicide amount reductions without change the weed control efficacy;
 2. the herbicide activity takes place within 6-8 hours and a subsequent rain doesn't riduce the efficacy;
 3. it is possible to apply the product even on well developed weeds or on weeds showing a reduced metabolism.

DOSES AND USE PATTERNS

Add the herbicide solution at the dose of 2 Kg per 100 liters of water.

PACKING: 1 KG BOTTLES-BOXES OF 20 PIECES, 6 KG CANS-BOXES OF 4 PIECES,
12-30 KG CANS.
