PHOSPHORUS PENTOXIDE (P_2O_5): 3%

AUTHORIZED IN ORGANIC FARMING
Raw materials: meat meal, bone meal
Mixture obtained only by organic fertilizers authorized in organic farming

Organic fertilizers: for at least 21 days after the application it is forbidden to feed livestock with pasture grasses, or distributed after harvest

FEATURES

This product associates the organic fertilisation with biocide substances contained in the organic matter. The use of this formula is advantageous both for short and long cultivations. It can be used to solve problems caused by the stubble seed and by the fatigue of the soil. FERTUM BIO-CONTROL is an excellent choice for the specialized agriculture thanks to the organic substance that works as enzymatic promoter, the biological fertilisation and the allopathic factors that reduce the proliferation of negative features for the root development.

DOSES AND USE PATTERNS

Horticulture and floriculture: 50 kg per 1000 m²
Plant nursery: 50-70 kg per 1000 m²
Oper field arboriculture: 5-7 quintals per hectare
The product has to be applicated on all the cultivation and has to be mixed with the soil (about 5-8 cm).

PACKING: 10 KG BAGS.
